
Small File Photo Festival

The Small File Photo Festival is a mini festival encouraging and celebrating small size photography!

The media industry pushes for higher resolutions increasing emissions and general environmental impact. Meanwhile smaller images offer wider accessibility and circulation, as well as an exciting and diverse range of aesthetic possibilities to explore. This festival aims to encourage experimentation with more efficient digital image formats and their specific visual qualities.

Following an Open Call for Small File Photo's from over 400 entries, the jury – Antonio Roberts, Roel Roscam Abbing, Clare Strand and Marloes de Valk – shortlisted 38 submissions for an online exhibition. Find out more.
